PRECISION ENGINEERED TO FLOW...

IMPORTANT NOTICE

PUMP STATION MAINTENANCE

As essential mechanical equipment it is important to maintain your pump station to prevent premature failure which can cause flooding or catastrophic failure.

Reasons the Red Light may be flashing on a pump station.

1. Reminder you need a service for routine maintenance.
2. Pump Station fault.

Red light only – If there is no audible alarm and the light is flashing it is a reminder the system needs a service.
Audible alarm and red light – The system has a fault and requires urgent attention.

If you require assistance contact the experts on 03 8368 0000.
